

ERIC COUPAL

SRE / CLOUD ARCHITECT

CONTACT

Based in Lyon, France

SKILLS

- AWS / GCP / Azure
- Kubernetes, Docker, Helm, Crossplane
- Terraform, Ansible
- GitLab CI, Jenkins
- Datadog, Tsuga, Grafana
- FinOps (Costory, Apptio)
- Kafka, Debezium
- PostgreSQL, MySQL, MongoDB
- Linux, Python, Go, Java

EDUCATION

- AEC in Computer Programming
  Collège de Bois-de-Boulogne
  2003 - 2004
- Computer Science studies
  CEGEP Régional Lanaudière
  1999 - 2001

ABOUT ME

With over 20 years of experience in software development and infrastructure, I am passionate about cutting-edge technologies and cloud architecture. An expert in large-scale infrastructure management and automation, I am recognised for my ability to design robust, secure and high-performance solutions. Organised, autonomous and versatile, I am committed to optimising cloud environments while ensuring the resilience of critical systems.

EXPERIENCE

- **PLATFORM ENGINEER**
  BELIEVE / 2022 - PRESENT

  - Design and evolve cloud infrastructure supporting business-critical applications.
  - Operate and improve cloud-based environments, Kubernetes workloads and infrastructure managed through Terraform.
  - Build end-to-end CI/CD pipelines: build, test, security scanning, quality gate and deployment.
  - Advance deployment automation, GitOps practices and continuous delivery in partnership with software engineers.
  - Improve observability, incident response, production diagnostics and long-term service reliability.
  - Work across application, infrastructure and data layers to investigate difficult production issues.

- **TECH LEAD**
  CRÉDIT AGRICOLE / 2021 - 2022

  - Designed the software architecture (microservices, REST APIs) for scalability and performance. Selected technologies, led teams, ran code reviews and optimised performance.
  - Automated builds and deployments via CI/CD (GitLab CI, XL Release), standardised environments (Docker, Kubernetes) and integrated automated testing.
  - Led technical coordination, solved complex problems, mentored developers and wrote documentation.

EXPERIENCE

- **LEAD DEVELOPER**
  APRIL / 2020 - 2021

  - Supervised and coordinated a Scrum team, provided technical guidance and aligned efforts to ensure code quality and meet deadlines.
  - Worked with architects and stakeholders to set the technology direction and choose the frameworks, tools and architectures best suited to project needs.

- **TECH LEAD**
  ENEDIS / 2019 - 2020

  - Defined and implemented scalable, modular microservices architectures, improving application resilience and performance.
  - Implemented an API Gateway to handle routing, authentication and data flow management.
  - Set up optimised CI/CD pipelines with integrated testing for fast, reliable continuous deployment.

- **DEVOPS ENGINEER**
  FRANPRIX / 2018 - 2019

  - Installed, configured and managed OpenShift clusters on Azure.
  - Deployed and configured 3scale API Management to handle traffic and security.
  - Set up CI/CD pipelines with Jenkins for fast, reliable continuous deployment.

- **APPLICATION ARCHITECT**
  BANQUE POPULAIRE / 2017 - 2018

  - Migrated legacy applications to Kubernetes, re-architecting them as microservices (CQRS, event sourcing).
  - Deployed and configured Kafka for data streaming, ensuring resilient communication between microservices.

- **CLOUD ENGINEER**
  INSIDESALES / 2016 - 2017

  - Built a solution to process and analyse Salesforce data, delivering real-time insights.
  - Designed and optimised the database schema to store and manage analytical data efficiently.
  - Set up the AWS cloud infrastructure to host and grow the application, ensuring scalability and reliability.

- **CLOUD ENGINEER**
  MNUBO / 2015 - 2016

  - Built an API to collect and process data from connected devices, enabling efficient management of IoT data flows.
  - Designed a middleware to connect the collected data with other systems and applications.
  - Set up the Kubernetes infrastructure to ensure scalability and service management.

EXPERIENCE

- **APPLICATION ARCHITECT**
  BANQUE DE FRANCE / 2014 - 2015

  - Provided expertise, advice and coordination to meet the needs of project and application teams.
  - Wrote in-depth analyses to assess the impact of technical changes and plan their rollout.
  - Led studies to optimise application performance, ensuring efficiency and scalability.

- **SOFTWARE ENGINEER**
  INFORMATIQUE CAISSE DES DÉPÔTS / 2012 - 2014

  - Designed an application to process and restructure social housing loans, streamlining internal processes.
  - Built a middleware to connect legacy systems with new applications.

- **SOFTWARE ENGINEER**
  SOCIÉTÉ GÉNÉRALE CIB / 2011 - 2012

  - Built a solution used by brokers and their associates to manage Exchange Traded Funds (ETFs), streamlining transactions and investment management.
  - Interfaced the application with external trading and transaction management systems to ensure smooth operations.
  - Implemented access control mechanisms for secure user management, with different authorisation levels for brokers and their associates.

- **SOFTWARE ENGINEER**
  SFR / 2009 - 2011

  - Designed and built an application letting users easily manage their online accounts: viewing information, updating data and interacting with related services.
  - Connected the platform to external services (e.g. online payment, email or SMS notifications) to enrich the user experience.
  - Implemented robust authentication and authorisation mechanisms to protect user accounts.

- **SOFTWARE ENGINEER**
  BANQUE NATIONALE DU CANADA / 2004 - 2009

  - Designed and delivered solutions for managing retail and business clients, making it easier to access banking services, view accounts and manage transactions.
